Annex 1 Description of the Action

1. Rationale

As part of the EU's solidarity response in support of Ukraine, the European Commission initiated a set of actions to help Ukraine export its agricultural produce – the EU-UA Solidarity Lanes.

Following Russia's invasion of Ukraine and its blockade of Ukrainian ports, Ukrainian grain and other agricultural goods can no longer reach their destinations. Considering Russia's refusal to extend the Black Sea Grain Initiative, the Solidarity Lanes have become the main route available for Ukraine's exports and imports. The situation is threatening global food security and there is an urgent need to establish alternative logistics routes using all relevant transport modes.

The currently widely used road transport is rather slow, costly and is limited in its capacity in terms of quantities of goods that can be transported.

The intention of this project is that the railway transport of the Republic of Moldova becomes one of the main transit corridors for Ukrainian goods to/from Danube Ports and Constanta Port.

In order to ensure the stabilisation and sustainability of the Moldovan rail transport system, there is an urgent need for rehabilitation of the main line railway infrastructure.

Having the rail infrastructure in good shape can take a large number of trucks off the roads and at border crossing points and maintain a high degree of mobility for people and goods.

Calea Ferată din Moldova ("CFM") will be the Grant Beneficiary. CFM is an integrated railway operator managing both railway infrastructure (approx. 1,080 km) and operations, as well as other non-core activities. CFM and, more broadly, the railway sector in Moldova are currently subject to a reform process, aimed at bringing the Moldova railway system in line with the EU acquis.

The EU-Ukraine Solidarity Lanes in Moldova is in line with the Eastern Partnership objective of "Investing in sustainable and smart connectivity" as well as with Moldovan and Ukrainian Governments' objectives to implement the reform and restructuring programme of the railway sector as well as to develop economically important infrastructures, including through further implementation of projects for the development of the extended indicative TEN-T.

The project will contribute to the Economic and Investment Plan for the Eastern partnership, in particular, to Flagship 4: Improving connectivity — anchoring Moldova in the TEN-T and to the specific objective of improved transport infrastructure foreseen by the Neighbourhood Development and International Cooperation – Instrument Multiannual Indicative Programme (2021-2027).

The project consists of rehabilitation of the existing non-electrified infrastructure and will not include electrification of the line. It will however be compatible with a potential future electrification.

2. The Project

The main objective of the project is to facilitate economic growth, trade and connectivity by rehabilitating the railway system in Moldova, thus improving the throughput capacity of the existing lines to Ukraine. The improved existing railway connection between Moldova and Ukraine aims at helping to facilitate trade and Ukrainian exports with the benefits for the Moldovan economy as well.

The expected **outputs** of this project are:

- Increased access to financial services and products to support low-carbon and climate resilient transport investments;
- Employment directly supported;
- Improved transport and logistics infrastructure/ facilities (Rehabilitation of approx. 128 km of mainline railway track);
- Leverage effect;
- Multiplier effect.

The expected **outcomes** of this project are (see details in Section 31):

- Employment indirectly supported;

- Increased connectivity for people and goods;
- Improved transport and logistics efficiency (time and cost).

The expected **impacts** of this project are:

- In the medium and long term, facilitation of the growth of key sectors of the Moldovan economy, higher productivity and competitiveness,
- In addition, in the short term, facilitation of exports from Ukraine and via the ports on the Danube and Prut rivers.

Project Components

The Project overall comprises the following project components:

- Component 1: Rehabilitation of main tracks (approx. 128 km) and rehabilitation and replacement of turnouts at stations along the corridor (approx. 74 units) on the section Valcinet – Ungheni – Chisinau – Cainari (including design and supply of materials);
- Component 2: Conceptual design, works supervision and support to the Project Implementation Unit (PIU).

The Grant will co-finance the EU-Ukraine Solidarity Lanes in Moldova project and, in particular, Component 1.

The final procurement plan will be adjusted according to the contract prices and the amounts of the loans of EIB and EBRD. The contract prices will be known once the procurement has been completed. For Component 1 (the main part of the project cost) this is expected in Q4 2024.

Implementation timetable

The procurement of the project components is expected to be launched in Q4 2023 / Q1 2024 and completed by end-2024.

Works are planned to be completed within one year after the signature of the works contract. Considering the risk of delays in the process, the works are expected to be completed by mid-2026.

3. Project sustainability

Maintenance of the infrastructure

The project will be maintained by the CFM. The Bank's review of CFM's capacity to adequately maintain the line is a component of the ongoing appraisal process. The capacity of CFM will be analysed in terms of existence of appropriate maintenance policies and rules, technical resources and staff and sufficient funding.

Social and environmental sustainability

The project as such will contribute to improving the sustainability of land transport in Moldova. Apart from some limited nuisance during the works, which will be mitigated by appropriate measures, the project is not expected to have any significant negative social or environmental impacts in the operation phase. This will be further appraised and the Promoter will be required to implement the project in line with the EIB Environmental and Social Standards.

The project will be compatible with a potential future electrification.

4. Value added of the EU Contribution

The north-south railway corridor in Moldova is railway infrastructure of key importance. In addition to the potential of serving the internal demand, it provides a transit route from western Ukraine to the ports of Reni (Ukraine), Giurgiulesti (Moldova) and Galati (Romania). These three ports are located on the Danube and Prut rivers and are accessible to seagoing vessels.

The line provides a sustainable means of transport, as the transport of passengers and goods by rail reduces the strain on the road system, and improves the safety and security of the transport system as a whole. Improving regional integration and connectivity is of vital importance for supporting economic development and trade. Renewing the railway line is expected to raise the mobility of people and support the transportation of goods, thereby unlocking growth potential in the areas served by the rehabilitated railway and ultimately raising living standards.

Besides long term benefit for Moldova as the beneficiary country, in the short term, in the context of the Russian aggression, the potential of the line to provide an export route from western Ukraine is extremely important for the economy of Ukraine.

The EU Contribution increases the concessional aspect of the EIB loan, thus decreasing impact on national debt.

The project will improve the safety of the transport system in the country and due to the expected modal shift from road to rail should contribute to reduction of road accidents and the corresponding fatalities and injuries.

The EU Contribution and accompanying EIB loan will ensure that the works are carried out to high technical standards, particularly in regard to rail safety, environmental and social aspects.

5. Financial leverage

The Leverage Effect of the EU Contribution under the Action is estimated to be 3.32 and the Multiplier Effect is estimated to be 3.7

6. Organisational Set-Up and Implementation Arrangements

The Borrower of the EIB loan is planned to be the Republic of Moldova through its Ministry of Finance.

The Grant Agreement will be co-signed with the Ministry Infrastructure and Regional Development, which is responsible for the railways, and with the Grant Beneficiary, that is, Calea Ferată din Moldova (CFM).

The North-South operation is planned to be co-financed with EBRD and implemented one single project financed through 1) EBRD loan and a grant from the EU Foreign Policy Instrument; and 2) EIB loan and a grant from NIP. The EBRD will have in place its own loan and grant documentation. The EIB and EBRD have been cooperating during the project appraisal phase and further cooperation is planned for the project monitoring. To this effect a Project Implementation Agreement is planned to be signed between the two lenders.

CFM, as Promoter, will be in charge of project implementation. A Project Implementation Unit (PIU) will be established at the Promoter in order to manage the project implementation. The specific arrangements are to be defined. Potentially this project may be added to the scope of activities of the PIU established for the ongoing Bendery – Giurgiulesti project: this will require strengthening the capacity of this PIU with additional staff of additional person-days inputs.

The works are expected to be procured by means of an international procedure in accordance with the EIB Guide to Procurement, with publication of the contract and award notices in the OJEU, and are planned to be co-financed by the EIB.

The works will be supervised by an independent work supervision engineer.

The procurement arrangements described above may be amended depending on the co-financing arrangements to be agreed between EIB and EBRD. In any event, the procurement of the components co-financed as part of the Action will be carried out in accordance with the EIB Guide to Procurement.
